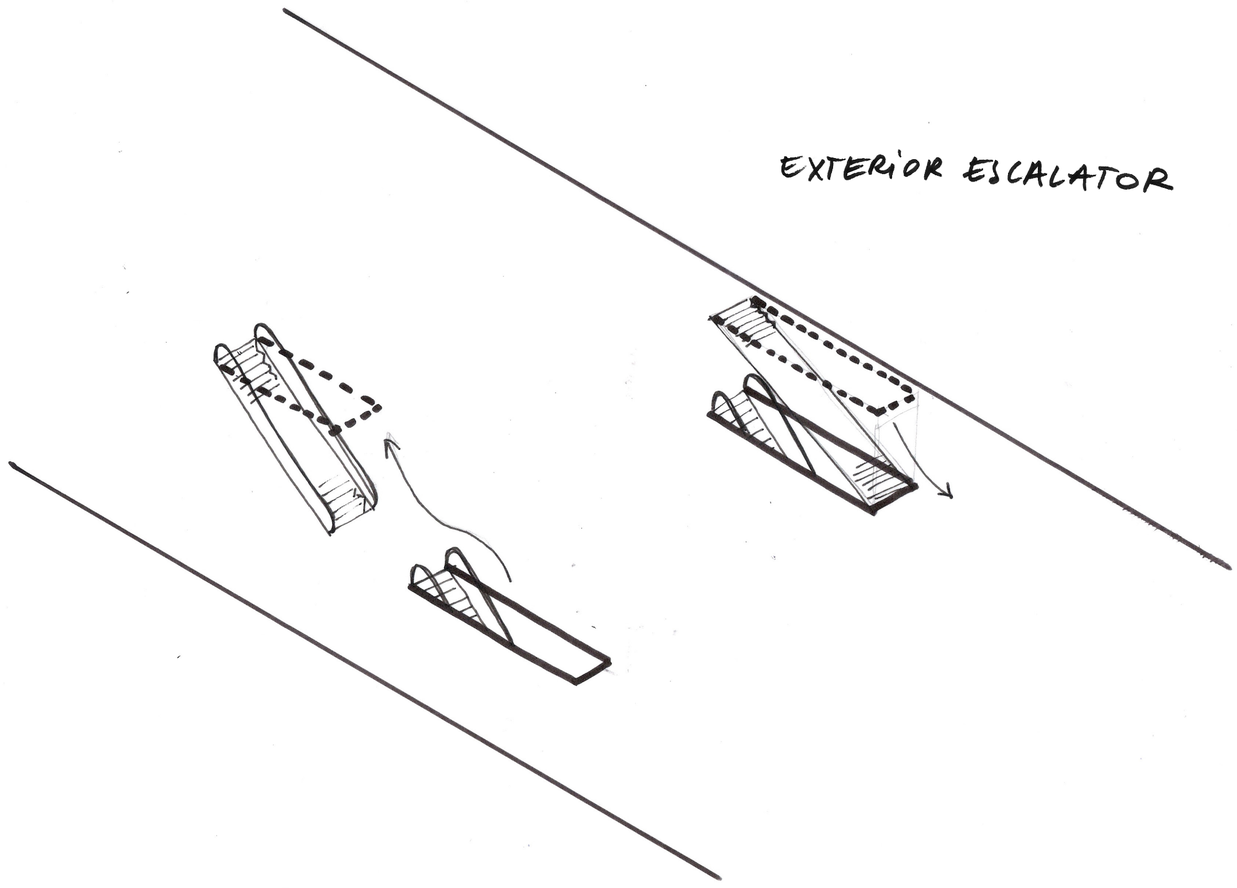
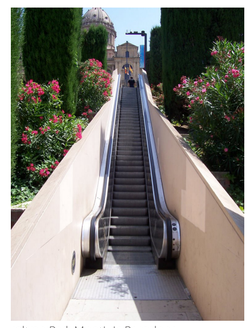
EXTERIOR ESCALATOR



metrotoegang Beursplein



roltrap Park Montjuic Barcelona

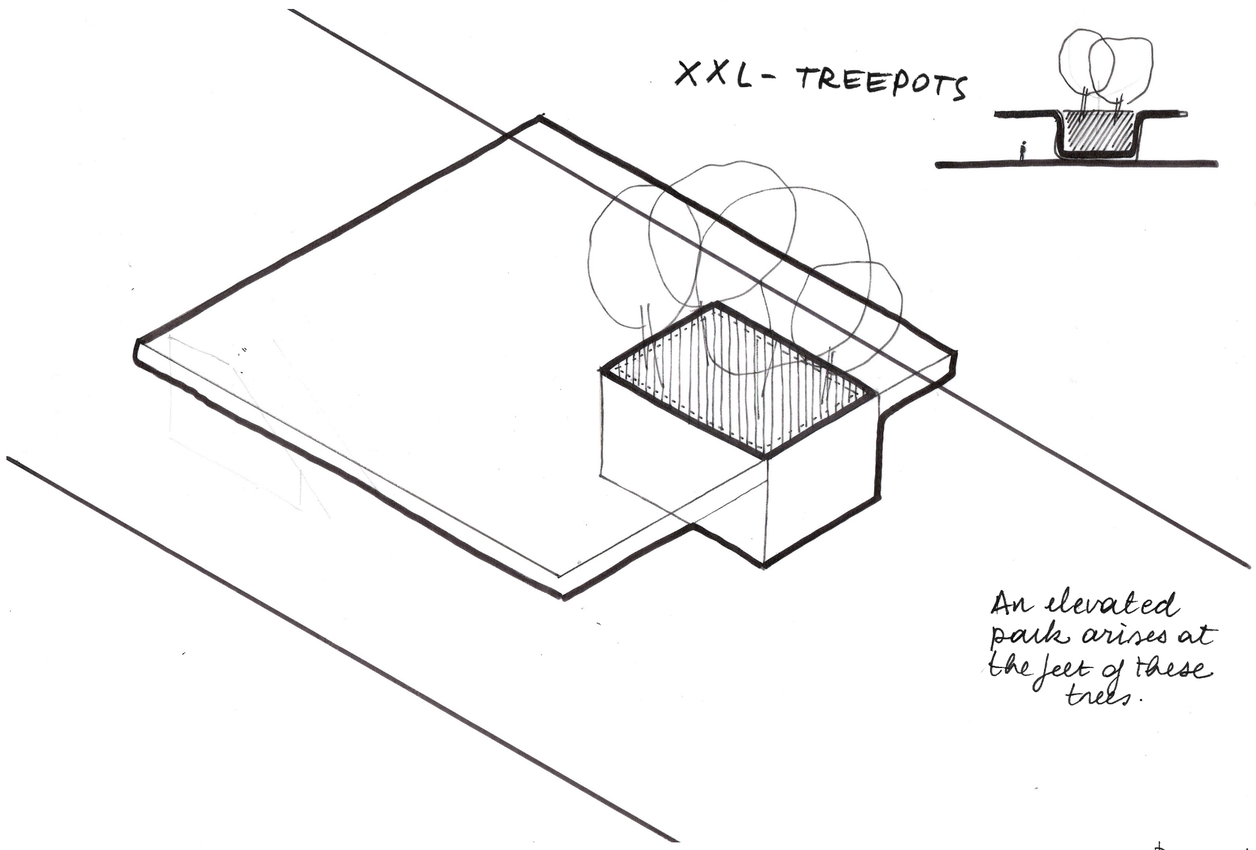
3D STREET

the entrance to the elevated square is made obvious.

the proposed vertical circulation is situated in the extension of the existing metro-circulation.

The Anspach would no longer form a linear transit road but a sequence of delaying / staying spaces places

XXL- TREEPOTS



An elevated park arises at the feet of these trees.

bestaande plantbakken

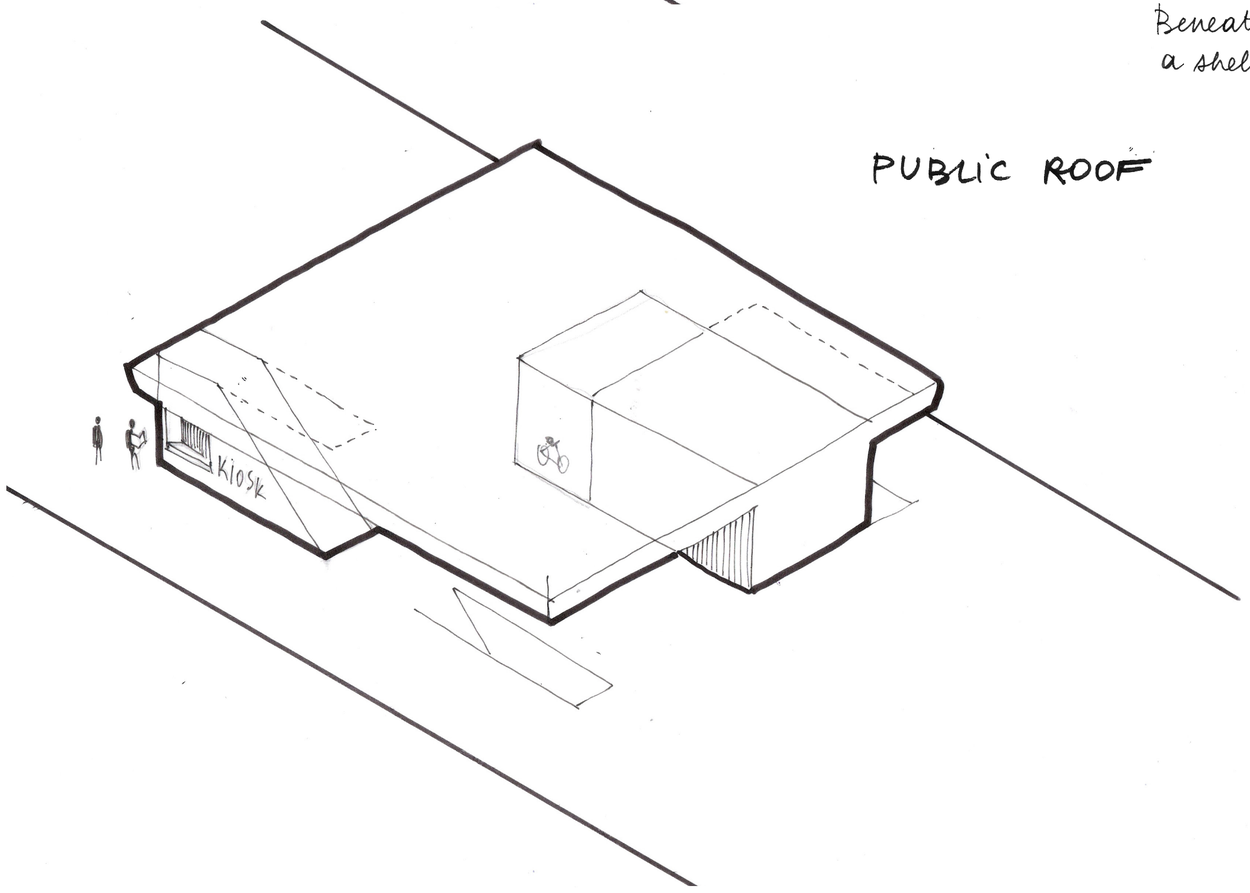
High Line Park New York

the existing "tree-pots" are replaced by XXL pots.
these can hold larger trees.
the elevated square is situated on the foot of the tree.

At night the underside of the rooftop is illuminated an creates an atmosphere of openness and lightness. which advantages the security.

Beneath the elevated square a sheltered public space is formed.

PUBLIC ROOF



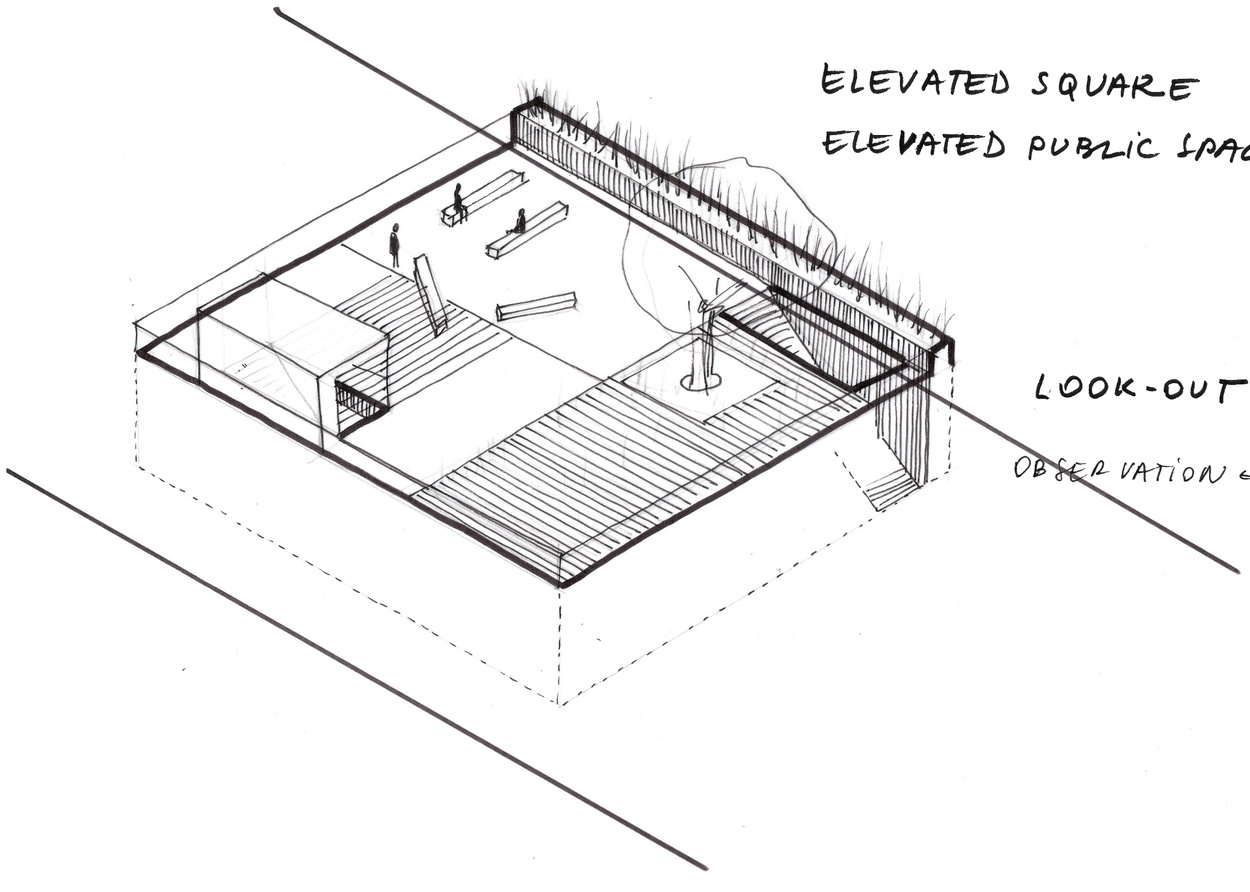
Park Spoor Noord Antwerpen

High Line Park New York

these 'points' are formed by a construction that is at the same time (can be):
- a rooftop
- an elevated park / square
- an elevated SQUARE
- a meeting point
- a shelter
- an
- a covered entrance / exit of the metro
- a kiosk
- a bicycle shelter
- a marketplace

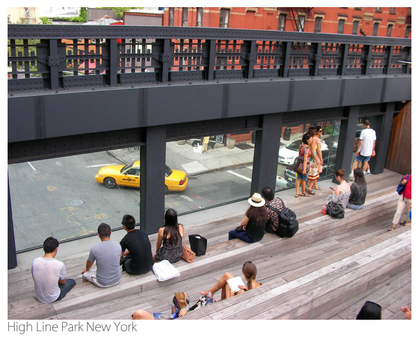
delaying
staying
stopping
detention
stopover
wait
stand

ELEVATED SQUARE
ELEVATED PUBLIC SPACE

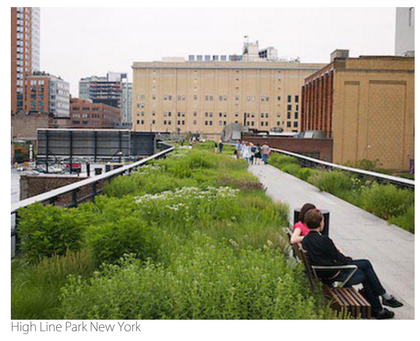


LOOK-OUT

OBSERVATION ⟷ circulation



High Line Park New York



High Line Park New York

these places are marked by a three dimensional "points" in the lineair space of the street

the public space gains an ETAGE
an extra FLOOR
